ABOUT ME

My professional experience has been shaped by working in diverse environments, and that helped me to be adaptive leader, and my goal is to make value wherever I am. Living in Poland and working in an international company, and education in WSB University, made me to be more detail oriented, as I should take care of responsibilities, while meeting with culture shock.

My experience is based on enterprise applications practices includes governmental procurement systems, system design, clean architecture, performance optimization, and hosting, implementing some integrations them on Cloud.

I use English actively and confidently in daily work environments. In addition, I speak Russian at a conversational level, have basic knowledge of Polish, speak Turkish like a native language, and Azerbaijani is my native language.

WORK EXPERIENCE

Smart Solutions Group – Baku, Azerbaijan

Senior Back end Engineer

[01/06/2026 – Current]

- Developing and maintaining large-scale .NET backend systems supporting complex procurement, tendering, evaluation, approval, and contract workflows.
- Designing REST APIs, business rules, validation mechanisms, background processes, and database-driven backend functionality.
- Integrating enterprise platforms with external systems, public-sector services, and third-party APIs.
- Investigating and resolving complex backend, database, integration, and production-environment issues.
- Supporting development, staging, and production environments throughout testing, release, deployment, and incident-resolution processes.
- Collaborating closely with frontend, QA, DevOps, and business teams to deliver reliable, scalable, and maintainable solutions.

Baku Slavic University – Baku, Azerbaijan

Software Engineer | Website Administrator

[07/2025 – Current]

Leader of a 5-member Website Coordinators team,

Designed and implemented the official Baku Slavic University website using .NET 8 MVC

Built reusable controllers and views

Built dynamic modules with 1 click publishable on Facebook and Instagram and news page,

Configured proper tokens for security

Experience with:

- HTML5, CSS3, Bootstrap, JavaScript
- C# (.NET 8 MVC), Entity Framework Core, DTOs
- N-tier structure, AutoMapper, Mediatr, Repository, CQRS Pattern, Clean Architecture & SOLID principles, Responsive design and performance optimization, Redis cache, RabbitMQ messaging
- Microsoft SQL Server, In-memory data models

- Microsoft Azure Blob Storage, Meta Graph API, Weglot API
- Git & GitHub for version control, Slack, JIRA

 **Microsoft** – Krakow, Poland

Cloud engineer

[01/2024 – 07/2025]

Supporting App Services which is based on c# .Net 8

Developing skills with cross resources(Azure Devops, VNets, AKS and etc.)

Experience with:

- Azure App Services - fixing configuration issues, code conflicts, specifying virtual network subnet for specific web apps; Integrating Azure Function Apps with other Azure resources(Azure Key Vault, Azure Storage) within Virtual Network; configuring VPN between on premise databases with App services.
- Azure AKS - connection with Managed Identity, health check issues for database connection
- Virtual network - configuring based on need to use private and public endpoints; setting Network Security Groups; peering endpoints.
- Azure DevOps & CI/CD Pipelines – Automating deployments, monitoring releases, and optimizing performance using Azure Pipelines.
- Application Performance Monitoring – Utilizing Azure Application Insights and Log Analytics to track application health, diagnose issues, and enhance system reliability.
- Azure Service Bus – Implementing and maintaining asynchronous communication between App Services, Function Apps, and AKS-based workloads

 **Rabalon LLC** – Baku, Azerbaijan

Software Engineer

[06/2022 – 08/2023]

Integrating Azure AI tools(text to speech, speech to text, speech translation to text, voice recognition, voice command) to Microsoft Hololens applications.

Building and managing Docker on container-based applications

Working on enterprise web-based projects as a Full Stack Developer(c#, .Net core MVC/REST API/SOAP API and Angular) and WordPress projects.

Managing CI/CD pipelines for automated applications

Integrating API on web projects are done with Web API, Rest API on c#, and Python.

Developing Automations with API integrations between automation and API sources (OpenAI, Whatsapp API, Telegram API, and etc.).

Modernizing monolithic application to microservices approach to be more scalable

Projects: Call Center API, Hololens Apps, enterprise web based applications, Internal tools for companies and etc.

Experience with:

1. TypeScript, Angular 7,12, 13, Vue.js, ReactJS, Quill.js
2. C#, .NET Core 5, 6, MVC, Rest API, Soap API, Onion Structure, N-tier structure, CQRS, Unit of Work approaches, Microservices, Kafka messaging, NServiceBus, WPF Applications
3. Unit Testing on Back End - Postman ,xUnit
4. Unit Testing on Front End - Jasmine
5. Unity: Microsoft Hololens applications based on 3D Modelization, Mixed Reality
6. Azure Services: Cognitive services, CI/CD pipelines, DevOPS, Azure Service Bus

PROJECTS

[06/2021 – Current]

Runo RUNO — AI-Powered Virtual ReceptionistDeveloped a real-time conversational application using Unreal Engine 5, MetaHuman, C++, ASP.NET Core, and OpenAI voice APIs. Integrated continuous microphone streaming, interruption handling, synchronized facial animation, web search, and company-specific knowledge. Packaged the solution as a standalone Windows application for business demonstrations.

Youtube videos are previous version, newer version will be published in a month.
